

Da Vinci Capital Invests in Global Technology Consultancy DataArt

NEW YORK, Nov. 12, 2018 /PRNewswire/ -- Da Vinci Capital, a leading emerging markets private equity firm, announced today that it has invested in DataArt, a leading global technology consultancy that designs and develops unique software solutions, to support the company's growth momentum in key industries.

DataArt will continue to focus on its three key markets: the U.S., the U.K. and continental Europe, where Da Vinci Capital has substantial assets and a proven track record, including steering software engineering powerhouse Epam to an initial public offering on the New York Stock Exchange in 2012.

Headquartered in New York City, DataArt employs over 2,500 professionals in 20 locations throughout the U.S., Europe, and Latin America, and has achieved exceptionally strong growth over the past eight years. The company is renowned for deep expertise in the development of customized enterprise and mobile software applications in key industries, including [financial services](#), [healthcare and life sciences](#), [media and entertainment](#), and [travel and hospitality](#). DataArt's [Blockchain](#) and [Internet of Things](#) centers of excellence have implemented projects in all industry sectors, solidifying the company's standing as a leading provider of innovative solutions. Clients include major global brands such as Nasdaq, TravelPort, Ocado and MeetUp.

DataArt's 2017 revenues exceeded \$124 million, which the company expects will grow annually by more than 20 percent. DataArt has appeared on the [Inc. 5000 List](#) of America's fastest growing private companies every year since 2010.

"DataArt's strong revenue growth is key to our interest in the company," said Da Vinci Capital Managing Partner Dennis Fulling. "DataArt focuses on providing high-quality engineering services for complex software projects. Da Vinci Capital is excited to partner with DataArt, and

we seek to replicate the success of our prior investment in Epam Systems, which completed an IPO on the NYSE in 2012."

Fulling continued, "Our exhaustive due diligence process revealed that DataArt has an exceptionally strong reputation among its clients, partners and industry peers for quality, integrity and performance, which was pivotal in Da Vinci Capital's decision to invest."

DataArt President Eugene Goland said, "We are excited to engage a strong partner for acquisitions and the capital markets. Access to capital is a vital ingredient for the development of a global technology consulting organization, and Da Vinci Capital's unique expertise in this segment is a tremendous asset for DataArt."

"This investment not only validates DataArt's market success, but is also a vote of confidence in its management team and its building of a robust and reliable operation."

Under the agreement, Da Vinci Capital acquired a substantial, non-controlling interest in DataArt. DataArt operations remain under the control and leadership of the existing DataArt executive management team.
