DataArt Partners With Amazon Web Services (AWS) To Drive The Benefits Of AWS-Based Infrastructure To Its Clients

Date 14/12/2016

DataArt, a global technology consultancy that designs, develops and supports unique software solutions, announced today that it became an Amazon Web Services (AWS) **Consulting Partner**. Amazon Partner Network (APN) provides support and access to a broad range of resources to help professional services firms design, architect, build, migrate and manage workloads and applications on AWS.

Modern business operations require sustainability, flexibility, security and scalability of IT systems. With the competition for value and bottom-line pressure increasing, businesses need cloud-enabled access to modern hardware, middleware, operating systems, databases and applications with minimal capital expenditure. **Statistica estimates that in 2016, spending on public cloud Infrastructure as a Service (IaaS) hardware and software is forecast to reach $38B growing to $173B in 2026.** AWS systems is the undisputed market leader, with a 45% share of public cloud infrastructure market in Q3, 2016 (Source: **Quarterly analysis** by Synergy Research Group).

The partnership aligns DataArt's engineering expertise with the industry-leading resources of AWS to enable solutions that interact harmoniously with the AWS infrastructure and services to address the business challenges faced by DataArt's clients. This important step will provide them with a wider range of affordable, on-demand technology that lets them take advantage of innovations in the IoT, Big Data and analytics, streamline operations and enable data-driven scalable business models.

"This partnership will help our clients' businesses become more agile and innovative, while allowing them to maintain the highest standards of service delivery, security and compliance. It will also help us to structure the cloud transition in a simple and secure way," said Igor Ilunin, Head of the IoT Practice at DataArt.
