

# Blockchain solutions

---

As the perception of blockchain is rapidly moving from exotic to mainstream, many companies still struggle to derive real business value from this promising technology.

With our 2+ years of hands-on experience building production blockchain-powered systems for our clients, DataArt can help your company put blockchain to work for your business. Our Blockchain Center of Excellence provides a full range of consulting services, including technology research, prototyping, development and operationalization.

We actively partner with the leading players in the blockchain world and maintain expertise in the various flavors and permutations of blockchain and distributed ledger technology (DLT), including Hyperledger, Ethereum, Chain.com, and others.

## DataArt can help you operationalize the benefits of blockchain

---

- Increased accuracy and reduced human error
- Improved efficiency (through elimination of lengthy and costly reconciliation) and reduced infrastructure costs
- Increased trust, transparency and auditability
- Reduced opportunity for fraud
- Increased resilience to outages and attacks
- Increased security through cryptography

Our experience covers a broad variety of use cases and blockchain/DLT technologies

## Blockchain success stories:

- Welfare payments distribution platform for government and private sector agencies
- Proprietary cryptocurrency wallet for intracompany payments and transfers
- Securities issuance and transaction settlement platform
- E-proxy voting system for a settlement depository
